

Important rate information

Limitations aggravate our work for you

Dear Patient

Dear relatives of patients

On 1 January 2018, the Federal Council implemented a modified rate for ambulant medical services. This has made many services much cheaper. Certain services of family medicine are slightly better compensated.

At the same time, however, the Federal Council has limited the duration of general practitioner care and set a maximum time limit. The following limitations may cause us problems:

- The consultation period is limited to 20 minutes, in special cases it can be extended to 30 minutes
- The time for a physical examination or an advisory conversation is also limited
- The so-called "work in the absence of the patient », e.g. for meetings with other doctors, therapists, caregivers or family members are also limited in time and only very limited possible

We think these restrictions are wrong. They are nothing else but hidden rationing measures. Unfortunately to the damage of the patients.

If we need more time for treatments or meeting than provided by the Federal Council, we will inform you and look for a solution together.

Thank you for your understanding!

With kind regards

Your Practice Team
