

ifa.

PROFITABLE

The ifa strives to generate added value for its customers. As a company that thinks sustainably, the ifa has to operate profitably.

Our beliefs at the Institute for Occupational Medicine

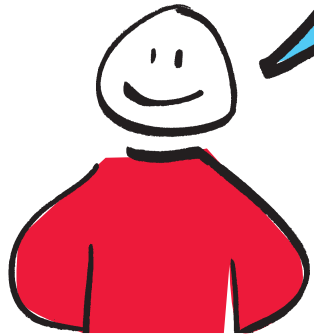

How do we deal with each other?

What is important to one another?

Profitable is ...

tangible and intangible.

Profitable
in ifa means ...

- ▶ Our customers should gain added value from our services.

- ▶ Our patients should become psychologically, somatically and socially healthier through our services.
- ▶ Our employees should be able to grow both personally and professionally. We generate profit through good teamwork and joy in our work. Our cooperation should enrich us with good feelings.
- ▶ Our work should lead to overall profit for the company. We want to maintain and create jobs and remain competitive. We want to continuously invest in a modern infrastructure.

Tip no. 1

Rethink the project

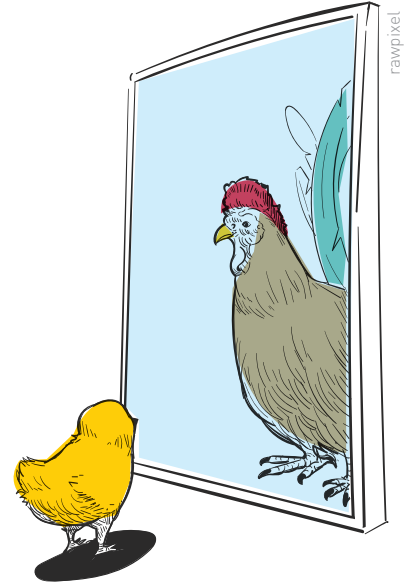

Think about every action and decision: "Is this beneficial for my customers/patients and for my company?"

Tip no. 2

Self-Assessment

Your reward will be generated by your independent actions and achievements. Think: "Can I finance my salary with my performance? Does my work for the ifa generate a profit?"

Tip no. 3

Satisfaction

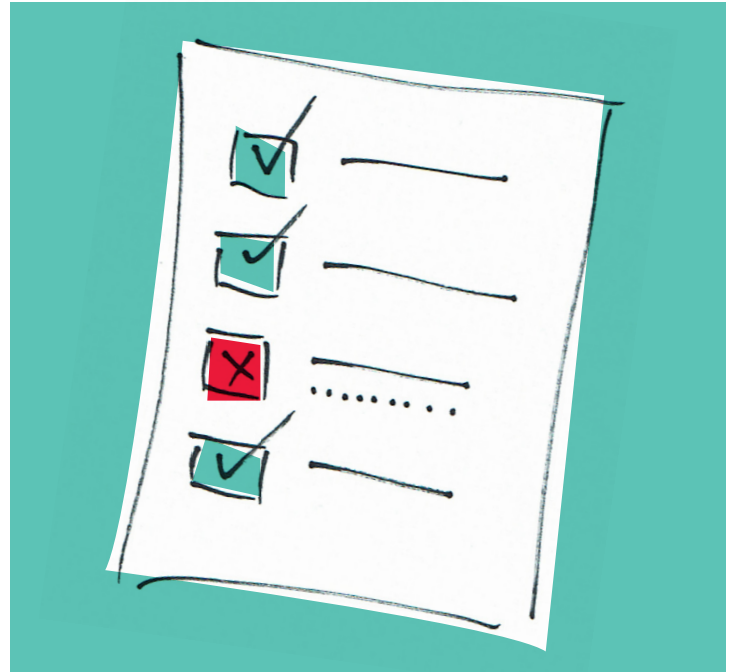

In patient work, consider: "Are my examinations and treatments profitable for my patients?"

Communication and transparency in patient work are decisive for mutual satisfaction.

Tip no. 4

Check

Constantly reflect on our processes and structures and use resources economically. Are the processes reasonable from an economic point of view and are they efficient? Help the ifa to become more efficient and better.
